

Algae Break 90® Instructions

Directions for use:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Dosage Rates:

Every Three Months: 16 fl.oz. of **ALGAE Break 90** per 10,000 gallons of pool water (or 500mL per 40,000 litres) will prevent algae growth in all pool types.

Sever Algae Treatment: 32 fl.oz. of **ALGAE Break 90** per 10,000 gallons of pool water (or 1L per 40,000 litres).

General Directions:

1. Maintain pool water in the pH range 7.2 to 7.8. Adjust pH to 7.2 for severe algae.
2. Ensure that filtration system is working properly and that filtration cycle is adequate.
3. A regular brushing program will assist in the removal of stubborn algae.
4. Calculate the volume of **ALGAE Break 90** required for your pool.
5. Add the product directly to the pool, distributing over as wide an area as possible.
6. While **ALGAE Break 90** controls algae, it is important that adequate levels of sanitizer (chlorine) be maintained to control bacteria growth.
