

Instructions

Directions for use:

Read the entire label before using.

1. Test spa water for calcium hardness level
2. Compare test results to chart below to determine appropriate amount of product necessary to make adjustment.
3. With spa circulating pump on high speed, add required amount directly into spa water. Continue circulating water a minimum 20 minutes. Do not pre-dissolve this treatment as heat is generated when it contacts water.
4. Retest and adjust if necessary.

Dosage Chart

All values are in dry ounces

Spa Volume 20ppm 40ppm 80ppm 100ppm

200gal	.75	1.5	3	3.75
400gal	1.5	3	6	7.5
800gal	3	6	12	15
