

Spa Oxidizing Shock™ Instructions

Directions for use:

Read the entire label before using

Initial Treatment: Add 2 ounces per 300 gallons of spa water.

Regular Treatment: After each time the spa is used, add 1 ounce per 300 gallons of water. Add 1 ounce per 300 gallons each week the spa is not being used. Add product with circulating pump running, continue circulating for at least 30 minutes. Turn the jets on and off once or twice after adding the product to improve the treatment.

NCI threaded safety cap = 1/2oz

NCI large over cap = 5oz
