

Cell Protect™ Instructions

Note: Cationic polymers used in many clarifiers, flocculants and polyquat algaecides should not be dosed to swimming pool water at the same time as metal control products. Cloudy water, precipitation and reduced product effectiveness may result. Wait 24 hours between additions.

Directions for use:

This product is designed for use in properly balanced pool water.

Monthly Maintenance Dosage: Add 1 bottle (33.9oz) of **Cell Protect** per 20,000 gallons to the pool water evenly around the edge.

Do not exceed recommended dose.

Note: If calcium hardness level is above 400ppm, add 1 bottle (33.9oz) per 10,000 gallons monthly.

Do not use with biguanides
