6 in. Round Valve Boxes

Smarter Design. Stronger Performance.

The original 6 in. valve box got the job done, but we knew it could be better. Introducing the next generation box—stronger, roomier, and designed for the way you work.

Spacious Design

- 15% more volume (compared to 107/108 valve boxes) provides more working space for hands and room for components
- Wider top opening for accessibility to components

Superior Strength

- 25% stronger top loading strength compared to 107/108 valve boxes
- Rolled-over top reinforces box and reduces deformation
- Internal ledge distributes force and provides additional strength

Versatile Functionality

- Box top fits 6 in. Spee-D® riser (101R) or bell end SDR-35 S&D pipe
- Cover features both snap-in and twist-lock design and knockout finger holes
- Dual lift tabs for easy removal
- Two holes allow pipe to pass through without the box resting on the pipe
- Cover underside features washer mounting post for metal detection and starter hole for marker disc
