### FEATURES

### BENEFITS

**Micro-Lite® narrow-kerf**

- Less power is required to make the same cut (as compared to 3/8" low profile .050" chain)

**Bumper drive link**

- Reduces kickback without sacrificing performance
- Meets ANSI B175.1 standards for low-kickback saw chain

- Outstanding performance, fast and efficient cutting
- Excellent stay-sharp

- Helps keep oil where it's needed, on the chain
- Directs oil to the critical rivet flange/hole interface

- Helps carry oil around the full length of the guide bar's groove

- Reduces vibration 25% or more at the saw handles

- Provides a visual guide to better maintain a proper filing angle

## SHARPENING NOTES

\* When using an OREGON® file guide, ALWAYS hold it level (0°) and flat on the top plate.

## WARNING

The saw chain in this package is low kickback saw chain. It met the reduced kickback requirements of ANSI B175.1 and CSA Z62.3 when tested on a representative sample of chain saws. Its safety features significantly reduce the hazard of kickback while maintaining high cutting performance.

ALL CUTTING CHAINS CAN KICK BACK, which may result in severe personal injury to the chain saw operator or bystanders. Operate your chain saw safely. Read all warnings in your chain saw operator's manual.
