

PLD SERIES

Mod D.E. Aboveground System

The advantages are distinctly clear.

Family, friends and even Fido can put a strain on your pool filtration system. To help keep your water in perfect condition is a job best left to Sta-Rite, a leader in filtration technology. To enjoy the cleanest, clearest water in your backyard pool, install a PLD Series Mod D.E. Aboveground System, featuring diatomaceous earth (D.E.) filtration. Diatomaceous earth, a natural substance, is so fine it traps dirt and debris as small as five microns (1/10 the width of a human hair). Body oils, suntan lotions, pollens, dust and even some bacteria are trapped in the filter, leaving behind sparkling clear, healthier water.

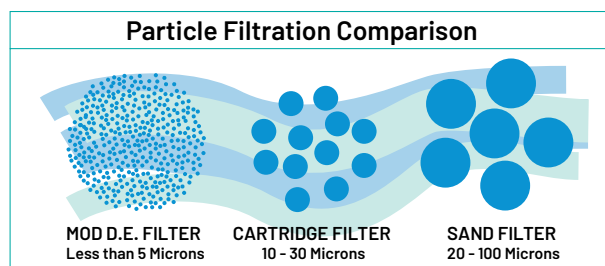

- **Single module replaces complicated multi-grid assemblies that are difficult to clean and reassemble.**
- **Balanced-flow tank design maximizes the use of the module's surface area to trap more dirt and reduce the frequency of cleaning.**
- **Precision-engineered pump components significantly reduce sound levels and won't intrude on those peaceful, quiet times.**

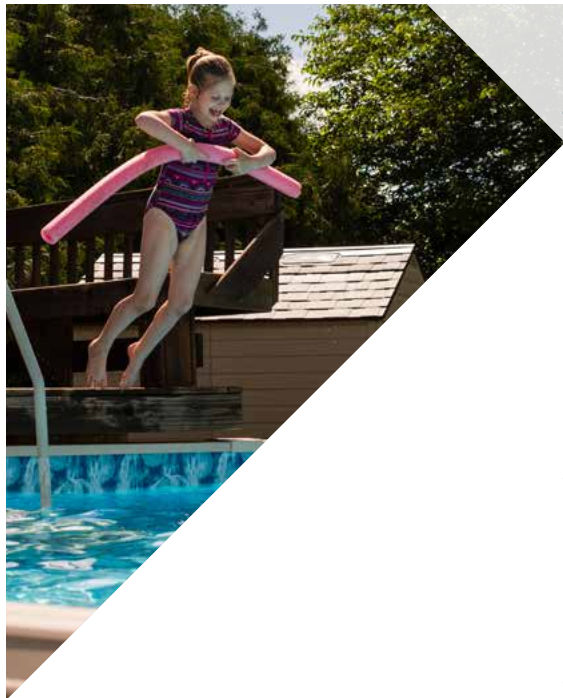

The advantages are perfectly clear. Enjoy the distinct benefits of the PLD Mod D.E. System.

PLD SERIES MOD D.E.
ABOVEGROUND SYSTEM

PLD SERIES MOD D.E. ABOVEGROUND SYSTEM

A dynamic duo.

The PLD Series Mod D.E. Aboveground System incorporates a performance-matched pump and filter. And, with your leisure time in mind, the components are designed to need only occasional maintenance.

- **Less maintenance . . .YES!**

The balanced-flow tank design directs water through both sides of the filter module, which dramatically increases filter surface area and dirt-loading capability. And that means a longer time between cleanings.

- **Easy cleaning**

For quick cleaning, simply remove the tool-free tank lid and spray-rinse the module* while it's still in place. In minutes, it's ready for another season.

FILTER KEY FEATURES

- **Top-mounted pressure gauge**

Information panels are positioned for easy reading

- **Split-tank design**

Permits rinse-in-place cleaning—super simple to achieve thorough cleaning fast

PUMP KEY FEATURES

- **Proprietary Totally Enclosed Fan-Cooled (TEFC) Motor**

Enhanced design and balanced flow enable energy efficiency and reduce operating costs.

- **Large strainer basket with see-thru lid**

For easy inspection and cleaning.

- **Fiberglass-reinforced components**

For superior strength, reliability and longevity.
