

## Season-long weed control in ornamentals and other non-crop areas

### WHAT IT IS

**Barrier® Ornamental Landscaping Herbicide** delivers dependable control of annual and perennial weeds, including dandelion, crabgrass, bluegrass, ragweed, and lambsquarters. Activated with rainfall or irrigation, the active ingredient of Barrier washes off the granule and attaches to soil organic matter. It then creates a "vapor barrier" in the upper two inches of the soil that slowly kills existing shallow-rooted weeds and grasses. Designed for use in established landscape and non-crop settings, Barrier is ideal for institutional sites such as hospitals, sport facilities, cemeteries, and apartment complexes.

### WHAT IT DOES

#### Barrier controls:

- Dandelion
- Crabgrass
- Bluegrass
- Ragweed
- Lambsquarters
- Many more listed broadleaf and grassy weeds

#### Ideal for use on:

- Institutional sites
- Residential sites
- Ornamental sites
- Roads and highways
- Driveways and parking areas
- Sidewalks and pathways
