VISION GRILLS™

Signature Series

The Signature Series line sets a new standard in features, function and style for Kamado grills.
Be the envy of every neighborhood with the very best in grilling, smoking, searing and baking.

VISION GRILLS™

The Difference

The thick, curved ceramic walls retain and distribute heat evenly around the Kamado to produce a convection environment.

This insures that your food will cook evenly and stay juicy every time.

By using lump charcoal instead of briquettes, the grill will start faster, burn cleaner and longer, and achieve much higher temperatures - all while producing less ash.

Remaining lump charcoal can also be reused!

VISION GRILLS™

Innovation

We've always sought to maintain the elegant simplicity of the traditional Kamado, and by adding a few key features, we've accentuated the elegance and enhanced the simplicity.

The **Electric Starter Port** makes lighting the grill as simple as plugging in your electric starter.

Dedicated **Smoking and Grilling Knobs** offer better temperature control than any other Kamado Grills.

Our pull-out **Ash Drawer** makes cleaning out your grill a breeze.

Quickchange

Versatility

The Quickchange Gas Insert has altered the course of grilling history with its unique capability to convert our grill between charcoal and gas.

You can enjoy the ease of gas grilling Monday through Friday, whether it be hamburgers, chicken, brats or hot dogs, and also enjoy the low-and-slow charcoal cooking of ribs, brisket or pork shoulders on the weekends.

Whatever you're craving... it's up to you!
