

Burlap Bags

Especially in environmentally sensitive areas, **Burlap Bags** are a sound alternative to standard sand or gravel bags. Since burlap is naturally grown (made from the skin of Jute plant) and made without any synthetic materials, **Burlap Bags** are 100% biodegradable, making them more eco-friendly than poly sandbags. Typical fill is 30 lbs sand or pea gravel. Custom fill weights available as well as different aggregates (see below).

Available Aggregate Fills

- 3/8" Pea Gravel
- Sand
- Bird's Eye Gravel
- 3/4" Crushed Rock

Quick Look

- Material Jute fiber Burlap
- Fabric Weight 8.9 oz. per sq. ft.
- Dimensions 14" x 26" - empty
