Panorama Demi & Supra

Panorama Demi & Supra combine the look of a natural stone with the ease of installation that interlocking pavers offer. Let this six-piece Panorama Series bring your next hardscape design to life with sophistication and richness. Panorama Demi & Supra can also be installed as stand-alone three-piece paving systems.

COMPOSITION AND MANUFACTURE:

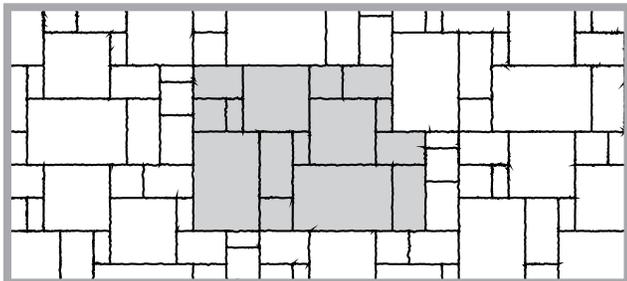

Panorama Demi and Supra are made from "zero slump" concrete under high frequency vibration; Panorama has an average compressive strength of 8000psi and an average absorption of 5% or less and will meet or exceed ASTM C 936, excepting the Supra units that have a face area > 101 sq. in.

INSTALLATION:

1. Excavate the proposed project area to a depth that allows for the thickness of pavers, sand bed, and base aggregate.
2. Install base using 3/4 inch minus dense graded aggregate, typically a minimum 4 inches to 8 inches thick (102mm - 203mm). Slope the pavement surface for drainage as per Site Engineer/Architect/Landscape Architect or a minimum 2% grade for positive drainage.
3. Install edge restraint on perimeter of the paver pavement as per manufacturers instructions.
4. Install a sand bed by screeding a 1 inch thick layer of coarse washed concrete sand conforming to the grading requirements of ASTM C 33. Screed to the grade and profile required.
5. Set paving stones on the sand bed, taking care to not disturb the sand bed.
6. Where required, cut pavers to fit accurately, neatly, and without damaged edges.
7. Compact using vibrating plate compactor. Protect the paver surface from damage by attaching a neoprene mat to the steel plate of the compactor or use a rubber roller attachment. An alternative method of protecting the paver surface is to place sheets of plywood on the pavers prior to compaction.
8. Post compaction, sweep dry ASTM C 33 or ASTM C 144 sand over the pavement to fill paver joints. Sand stabilization may be required. Remove excess sand from the paver surface.
9. Compact a second time.
10. Sweep additional sand into paver joints, filling the joints to 1/8 inch below the paver beveled edge.
11. Sweep paver surface clean for final acceptance by owner/owner's agent.

Complete installation & specification details are available by contacting your Pavestone Sales Representative.

INSTALLATION PATTERN: Panorama Combo

PRODUCT INFORMATION:

DEMI

APPLICATIONS:

Plazas • Courtyards • Esplanades • Sidewalks • Terraced • Gardens • Pathways
Pool Decks • Beach Promenades • Pedestrian Malls • Roof Garden • Residential Driveways

Nominal Dimenions: Sm. Rec.: 4"L x 8"W x 2 3/8"H
Med. Sq.: 8"L x 8"W x 2 3/8"H
Lg. Rec.: 8"L x 12"W x 2 3/8"H

Wt./Stone: Sm. Rec.: 6 lb
Med Sq.: 12 lb
Lg. Rec.: 18 lb

Stones/Pallet: 240

Approx. Wt./Pallet: 2,884 lb

Sq. ft./Pallet: 103

Sq. ft./Set: 1.29/3-Piece Set

Product Number: 367

SUPRA

APPLICATIONS: Non- Vehicular Only

Plazas • Courtyards • Esplanades • Sidewalks • Terraced • Gardens • Pathways
Pool Decks • Beach Promenades • Pedestrian Malls • Roof Garden

Nominal Dimenions: Sm. Rec.: 8"L x 16"W x 2 3/8"H
Med. Sq.: 16"L x 16"W x 2 3/8"H
Lg. Rec.: 16"L x 24"W x 2 3/8"H

Wt./Stone: Sm. Rec.: 24 lb
Med Sq.: 48 lb
Lg. Rec.: 72 lb

Stones/Pallet: 60

Approx. Wt./Pallet: 2,884 lb*

Sq. ft./Pallet: 103

Sq. ft./Set: 5.17/3-Piece Set

Product Number: 368

Note: Vehicular paver pavements may require civil engineering. All final pavement designs shall be approved by a licensed design professional familiar with local site conditions and building codes.

* Does not include 50 lb for wooden Pallet.
Not available in all markets.
