

**PAVERS**

# HOLLAND

With the renowned durability of interlocking pave stones, Holland Stone offers the Old World charm of a simple paver shape. The rectangular shape can be installed in a number of fascinating patterns to produce simple or intricate designs. Mix these patterns with any of the available standard colors or combination of colors and you've got the potential for an architectural effect limited only by the imagination.

\* Not for use in vehicular applications.

## FEATURES & BENEFITS

### Perfect For:

- Suitable for multiple applications. **See chart above.**
- Made of durable concrete with iron oxide pigments that will not fade with extended UV exposure. Meets or exceeds applicable requirements of ASTM C936 and C1782.

### Ease of Installation

- Joints and surfaces meet ADA gap and lippage requirements.
- Versatile 2:1 shape easily forms stacked, runner, basketweave, and herringbone patterns.

### Aesthetics

- Smooth surfaces and classical chamfers define each stone to create texture and visual structure with timeless appeal.

**Note:** Unit color, dimensions, weight, and availability varies by manufacturer.

## INSTALLATION INSTRUCTIONS

**STEP 1:** Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material - typically minimum 4-8 inches thick (101.6mm - 203.2mm). Compact base to optimum moisture/density or as otherwise directed by Site Engineer/ Architect/Landscape Architect.

**STEP 2:** Place bedding course of washed sand conforming to the grading requirements of ASTM C 33 to a maximum uniform depth of 1-1½ inch (25-38mm). Screed to the grade and profile required.

**STEP 3:** Install Holland with joints to a nominal 1/8 inch (3mm).

**STEP 4:** Where required, cut pavers with an approved cutting device to fit accurately, neatly and without damaged edges.

**STEP 5:** Use a low-amplitude plate compactor capable of at least minimum of 4,000 lbf (18 kN) at a frequency of 75-100 Hz to vibrate the pavers into the sand. Remove any cracked or damaged pavers and replace with new units.

**STEP 6:** Post compaction, spread and sweep dry ASTM C 33 or ASTM C 144 sand over the entire paving area.

**STEP 7:** Make one more pass with the plate compactor to completely fill the joints with sand.

**STEP 8:** Sweep paver surface clean for final acceptance by owner/ owner's agent.

**NOTE:** Colors are shown as accurately as possible in brochures and samples, but due to the nature of the product, regional color differences and variables in print reproduction, colors may not match exactly. For best results in maintaining color consistency, pavers are installed from several cubes at a time. Efflorescence, a whitish, powder-like deposit, may appear on concrete pavers. This is a natural occurrence in any concrete product and will usually wear off over time.

## INSTALLATION PATTERNS

1:2 Half Offset  
Runner

1:2 Herringbone

1:2 Basketweave

Holland II  
Basketweave

Holland II  
Herringbone

Holland  
Herringbone Mech  
Lay
