

# Collated Exterior Screws

## Deck-Drive™ DSV WOOD Screw

### Preservative-Treated Decking and Exterior Wood-to-Wood Applications

The Deck-Drive DSV Wood screw is a powerful fastening solution for preservative-treated decking applications. With its underhead nibs and fast-start tip, the DSV is ideally suited to be driven and countersunk into today's wood deck boards. The shank is designed to withstand the swelling and shrinkage that is common with fast-growth lumber. Available in hand-drive and in collated strips for use in our Quik Drive® auto-feed screw driving system.

#### Features:

- Low-torque threads allow up to 35% more screws to be driven per battery charge
- Rimmed flat head with nibs design countersinks easily and provides a clean, finished appearance
- High-low threaded tip with Type-17 point provides fast starts
- Optimized threads for dimensional lumber
- Quik Guard® coating provides corrosion resistance for exterior and preservative-treated wood applications
- Meets the performance requirements of ICC-ES AC257 exposure conditions 1 and 3
- Colors to blend in with most woods
- This screw is also available in bulk for hand-drive installation; see p. 76 for details
- T25 6-lobe driver bit: BITTX25
- The #10 DSV are load rated. See engineering letter L-F-DSVCSV at [strongtie.com](http://strongtie.com).

For Technical Data and Loads, see C-F-2023TECHSUP *Fastening Systems Technical Guide*, pp. 35, 45–46, 154–155, 176–177
