

**SANCTUARY GOLF**

# **SANCTUARY TDN®**

## **18-2-6 FAIRWAY GRADE**

**SANCTUARY TDN® 18-2-6** is homogenous organic based product that combines the release characteristics and benefits of multiple nitrogen sources. These nitrogen sources include ammonium sulfate, methylene urea and nitrogen from protein meals. This multiple nitrogen release approach provides good residual color and a cost effective organic based product for fairway applications for all turf types.

### **SANCTUARY BENEFITS**

---

- 1** Promotes Outstanding Residual Color, Turf Density and Rooting
- 2** Enhances Stress & Wear Tolerance plus Aids with Disease Management
- 3** Reduces Water & Seasonal Nutrient Levels
- 4** Promotes Microbial Populations that Reduce Agronomic Issues
- 5** Contains 72% Organic Ingredients that Build Soil Health

**THE SANCTUARY DIFFERENCE - TOTAL DIGESTIBLE NUTRIENT VALUE®**

# SANCTUARY GOLF

## 18-2-6 FAIRWAY GRADE

### GUARANTEED ANALYSIS

Total Nitrogen (N) ..... 18.0%

5.35% Ammoniacal Nitrogen

5.15% Water Soluble Nitrogen

7.50% Water Insoluble Nitrogen\*

Available Phosphate (P<sub>2</sub>O<sub>5</sub>) ..... 2.0%

Soluble Potash (K<sub>2</sub>O) ..... 6.0%

Derived from: Feather Meal, Fish Meal, Bone Meal, Methylene Urea, Ammonium Sulfate, Diammonium Phosphate and Potassium Sulfate.

\*7.5% slowly available nitrogen from feather meal, fish meal and methylene urea.

### DIRECTIONS FOR USE ON GREENS

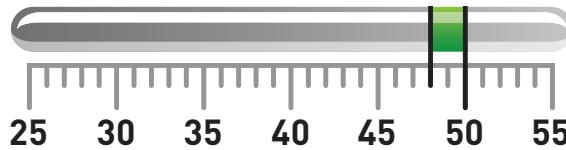

**MAINTENANCE RATE:** For excellent residual color and slow growth, the application rate is 4 bags per acre for 8 to 12 weeks of residual growth and color. For improved stress management, the rate is 2 bags per acre per month during hot weather.

**AERATION & LATE FALL PROGRAM:** These applications provide an excellent opportunity to add life and energy back into the soil. The application rate is 4 bags per acre.

**BERMUDAGRASS PROGRAM:** For residual color and enhanced nutrient management, the application rate is 3 bags per month, especially, during times of stress. The product is ideal for winter application on overseeded Bermudagrass at a rate of 4 bags per acre for 12 weeks of color.

**TEE RECOVERY PROGRAM:** For improved turf recovery, the application rate is 4 bags per acre per month. This will improve the overall playability and quality of the tees.

### TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

Natural fertilizers stimulate the soil microbes due to their nutritional value or TDN Value. The higher the TDN value - the greater the impact on agronomic results.

Traditional Fertilizer ..... 0 TDN

Bio Solid Fertilizer ..... 2 TDN

Poultry Litter Fertilizer .... 20 TDN

Protein Meal Fertilizers.... 80 TDN
