

poolLUX™ Power

poolLUX Power combines a step-down transformer with switched lighting control that is simple to use and may decrease installation costs.

- Simple power and lighting control in one unit
- Built-in on/off switch increases convenience and can save on electrician costs
- Oversized wiring area for easy installation
- Convenient terminal strip wiring – no wire nuts required
- Corrosion resistant polycarbonate housing for harsh pool environments
- 60W or 100W options
- ETL Listed - conforms to pool, spa and fountain power unit standard UL 379 and certified to CSA C22.2#218.1
