Always test a small area. Check product label for interior/exterior use. Refer to surface material manufacturer's recommendations on whether or not to seal.

Choose the Look You Want

### Penetrating = PS/PSX

Natural Look

Penetrating sealers create an invisible protective barrier. Available in Paver Seal (PS, PSX), Wetcast Seal (W-PSX) and Premium Stone Seal (S-PS, S-PSX).

Low Gloss = LG/LGX

Color Enhancing

Low Gloss sealers create a protective barrier while providing a color-enhancing surface sheen. Available in Paver Seal (LG, LGX) and multi-surface Specialty Seal (DG).

High Gloss = HG/HGX

Wet Look

High Gloss sealers provide protection with a wet look. Available in Paver Seal (HG, HGX), Wetcast Seal (W-HGX) and Premium Stone Seal (S-HGX).

Seal to Protect Your Investment

Sealed VS **Unsealed**

Wet / Dry (Sealed)

Wet / Dry (Unsealed)

Prevent Damage and Lock Out:

- Salt/Acid Rain
- Pool Chemicals
- Color Fade
- Surface Erosion
- Deep Staining
- Freeze/Thaw

In these images you can see how unsealed pavers allow moisture and contaminants to seep into the surface. In contrast, water and salt pools on top of the sealed surface.
