Material Safety Data Sheet

Issuing Date 13-Feb-2007 Revision Date 23-March-11 Revision Number 1

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name ROCKIN FOAM®

Recommended Use Waterfall Design and Landscape Exterior Adhesive

Supplier Address Tierra Innovations, Inc.

5447 Laguna Park Drive Elk Grove, CA 95758 TEL: (916) 606-6102

Emergency Telephone Number Chemtrec 1-800-424-9300

(703) 527-3887 outside US

2. HAZARDS IDENTIFICATION

DANGER!

Emergency Overview

Flammable gas. May cause flash fire.

Contents under pressure. Avoid temperatures above (120°F)

Irritating to eyes, respiratory system and skin.

May produce an allergic skin or respiratory reaction

Vapor reduces oxygen available for breathing. Lower oxygen levels may cause anesthetic effects.

May cause drowsiness and dizziness. Keep upwind of spill. Stay out of low areas.

Appearance Black Physical State Liquid Aerosol Odor Faint hydrocarbon

Potential Health Effects

Principle Routes of Exposure Inhalation, Skin contact, Eye contact.

Acute Toxicity

Eyes Irritating to eyes. May cause slight temporary corneal injury due to adhesive character.

Skin Prolonged skin contact may cause moderate skin irritation with local redness. May cause

sensitization by skin contact. Repeated or prolonged skin contact may cause allergic reactions

with susceptible persons. Will bond to skin causing irritation upon removal.

Skin Absorption Prolonged skin contact is unlikely to result in absorption of harmful amounts.

Inhalation Excessive exposure may cause irritation to upper respiratory tract. Symptoms of excessive

exposure may be anesthetic or narcotic effects: dizziness and drowsiness may be observed. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal. Inhalation of vapors in high concentrations may cause shortness of breath (lung edema).

2. HAZARDS IDENTIFICATION

Respiratory Sensitization: May cause allergy or asthma symptoms or breathing difficulties if inhaled. MDI concentrations

below the exposure guidelines may cause allergic respiratory reactions in individuals already sensitized. Asthma-like symptoms may include coughing, difficult breathing and a feeling of

tightness in the chest.

Ingestion May be harmful if swallowed. May cause additional affects as listed under "Inhalation".

Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. Product may cure in the gastrointestinal tract and form an obstruction. May cause adverse cardiac effects,

blood disturbances, and metabolic acidosis.

Chronic Effects

Tissue injury in the upper respiratory tract and lungs has been observed in laboratory animals

after repeated excessive exposures to MDI / Polymeric MDI aerosols. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal. Chronic hydrocarbon abuse has been associated with irregular heart rhythms and potential cardiac arrest. Repeated

or prolonged contact causes sensitization, asthma and eczemas.

Birth / Developmental Effects: In laboratory animals, MDI/Polymeric MDI did not cause birth defects; other fetal effects

occurred only at high doses that were toxic to the mother.

Aggravated Medical Conditions Allergies. Skin disorders. Respiratory disorders. Central nervous system. Preexisting eye

disorders. Kidney disorders. Liver disorders.

Interactions with Other Chemicals Irritants. Sensitizers. Epoxies. Use of alcoholic beverages may enhance toxic effects.

COMPOSITION/INFORMATION ON INGREDIENTS		
Chemical Name	CAS-No	Weight %
Flame retardant	Proprietary	10-30
Polymethylene polyphenylene isocyanate	9016-87-9	10-30
Methylene bisphenyl isocyanate (MDI)	101-68-8	10-30
Polyol blend	Proprietary	10-30
Polyol blend	Proprietary	5-10
Isobutane	75-28-5	5-10
Methylenediphenyl diisocyanate	26447-40-5	1-5
Propane	74-98-6	1-5
Dimethyl ether	115-10-6	1-5

4. FIRST AID MEASURES

General Advice If emergency warrants call 911 or emergency medical service. Show this safety data sheet to

the doctor in attendance. Remove and wash soiled clothing before reuse.

Eye Contact Immediately flush with plenty of water. After initial flushing, remove any contact lenses and

continue flushing for at least 15 minutes. Keep eye wide open while rinsing. Obtain medical

attention, preferably from an ophthalmologist.

Skin Contact Remove contaminated clothing; wash before reuse. Foam will stick to skin; studies

demonstrate that cleaning very soon after exposure with corn oil or nail polish remover is most effective. If foam dries on skin, apply generous amounts of petroleum jelly or lanolin, put on plastic gloves and wait 1 hour. With a clean cloth, firmly wipe off petroleum jelly and repeat

process if necessary. Do not attempt to remove dried foam with solvents.

Inhalation Move victim to fresh air. Apply artificial respiration if victim is not breathing. If breathing is

difficult, oxygen should be administered by qualified personnel. Call a physician or transport to

a medical facility.

Ingestion Call a physician or Poison Control Center immediately. May produce an allergic reaction. Do

not induce vomiting unless directed to do so by medical personnel. Drink plenty of water.

Never give anything by mouth to an unconscious person.

Notes to Physician Maintain adequate ventilation and oxygenation of the patient. May cause asthma-like (reactive

airways) symptoms. May cause respiratory sensitization or asthma-like symptoms.

Respiratory symptoms, including pulmonary edema, may be delayed. Exposure may increase "myocardial irritability". If you are sensitized to diisocyanates, consult your physician regarding working with other respiratory irritants or sensitizers. No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the

patient.

Protection of First-Aiders Remove all sources of ignition. Ensure that medical personnel are aware of the material(s)

involved, and take precautions to protect themselves.

5. FIRE-FIGHTING MEASURES

Flammable Properties Aerosol cans exposed to fire can rupture and spread fire to other

areas. Vapors are heavier than air and may travel a long distance

and accumulate in low-lying areas.

Flash Point -104°C / -155°F (based on propellant.)

Suitable Extinguishing Media Isolate fire and deny unnecessary entry. Use an extinguishing

agent suitable for type of fire. Dry chemical ${\rm CO}_2$ water spray, fog or regular foam. Stay upwind. Keep out of low areas where gases fumes can accumulate. Damaged cylinders should be handled only

by specialists.

Explosion Data

Sensitivity to mechanical impact None

Sensitivity to static discharge Yes

Specific Hazards Arising from the Chemical Propellant is flammable and will burn. Eliminate ignition sources.

Ruptured cylinders may rocket. Chemicals other than propellant may burn but none ignite readily. Flash back possible over considerable distance. Thermal decomposition can lead to release of irritating gases and vapors. In the event of fire and/or explosion

do not breathe fumes.

Protective Equipment and Precautions for Firefighters As in any fire, wear self-contained breathing apparatus pressure-

demand, MSHA/NIOSH (approved or equivalent) and full protective

gear.

NFPA Health Hazard 2 Flammability 4 Stability 1 Physical and Chemical Hazards -

HMIS Health Hazard 2* Flammability 4 Stability 1 Personal Precautions B

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions Do not touch or walk through spilled material. Use appropriate safety equipment. Evacuate

area. Keep personnel out of low areas, confined or poorly ventilated areas. Keep upwind of spill. Ensure adequate ventilation. Remove all sources of ignition. No smoking in area. Only

trained and properly protected personnel must be involved in clean-up operations.

Methods for Containment If possible, turn leaking containers so that gas escapes rather than liquid. Allow substance to

evaporate. Contain spilled materials if possible without risk. Absorb with materials such as Sawdust. Dirt Vermiculite. Collect in suitable and properly labeled open containers. Do not place in sealed containers. Curing foam gives off CO₂. Wash what is left of the spill site with

large quantities water.

Methods for Cleaning UpAttempt to neutralize the spilled material by adding suitable decontaminate solution:

Formulation 1: Sodium carbonate 5-10%; liquid detergent 0.2 – 2%; water to make up to 100%, OR Formulation 2: concentrated ammonia solution 3 – 8%; liquid detergent 0.2 – 2%; water to make up to 100%. If ammonia formulation is used, use good ventilation to prevent

vapor exposure. Sweep up and shovel into suitable containers for disposal.

Other Information

Ventilate the area. Curing foam gives off CO₂. Do not put curing foam in a sealed drum.

7. HANDLING AND STORAGE

Handling

Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Ensure adequate ventilation. Take necessary action to avoid static electricity discharge (which might cause ignition of organic propellant vapors). Keep away from open flames, hot surfaces and sources of ignition. Do not Smoke. Avoid breathing vapors or mists. Contents under pressure. Do not puncture or incinerate cans. Container, even those that have been emptied, can contain vapors. Do not cut, drill, grind, weld or perform similar operations on or near empty containers. Do not stick pin or any other sharp object into opening on top of can.

Storage

Keep containers tightly closed in a cool, well-ventilated place. Keep in properly labeled containers. Keep in an area equipped with sprinklers. Keep out of the reach of children. Ideal storage temperature is $16-32~^{\circ}\text{C}$ / $60-90~^{\circ}\text{F}$. Storage above $32~^{\circ}\text{C}$ / $90~^{\circ}\text{F}$ will reduce its shelf-life. Never keep at temperatures above $48.8~^{\circ}\text{C}$ / $120~^{\circ}\text{F}$.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines

Chemical Name	ACGIH TLV	OSHA PEL	NIOSH IDLH
Methylene bisphenyl isocyanate (MDI)	TWA: 0.005 ppm	Ceiling: 0.02 ppm Ceiling: 0.2 mg/m ³	75 mg/m ³
Isobutane	TWA: 1000 ppm	N/A	N/A
Propane	TWA: 2,500 ppm STEL 1,000 ppm, 3,500 mg/m ³	8Hr TWA: 1000 ppm 1,800.0 mg/m ³	2100 ppm

NIOSH IDLH: Immediately Dangerous to Life or Health

Engineering Measures Showers

Eyewash stations Ventilation systems

Personal Protective Equipment

Eye/Face Protection

Safety glasses with side-shields.

Skin and Body protection

Impervious gloves. Lightweight protective clothing.

Respiratory Protection

Atmospheric levels of PMDI should be maintained below the exposure guidelines. If exposure limits are exceeded or irritation is experienced, use a NIOSH/MSHA approved air-purifying respirator equipped with an organic vapor absorbent and a particle filter. For situations where the atmospheric levels exceed the level for which an air-purifying respirator is effective, use a positive-pressure air-supplied respirator. Respiratory protection must be provided in

accordance with current local regulations.

Hygiene Measures

When using, do not eat, drink or smoke. Maintain regular cleaning of equipment, work area and clothing.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance Black Odor Faint hydrocarbon

Odor Threshold No information available Physical State Liquid Aerosol

pH No information available

Flash Point -104°C / -155°F (based on propellant.)

Autoignition Temperature Not applicable

Decomposition temperature No data available **Boiling Point/Range** -42°C / -43.6°F

Melting Point/Range Not applicable

Viscosity No information available Flammability Limits in Air No data available

Explosion Limits No data available

Specific Gravity 1.01 Water Solubility Not Compatible

Solubility No data available Evaporation Rate No data available

Vapor Pressure No data available Vapor Density No data available

Partition Coefficient (n-

octanol/water)

Not applicable

EPA VOC 1.29 (lb/gal) 155 (g/l)

10. STABILITY AND REACTIVITY

Stability Stable under recommended storage conditions

Conditions to Avoid Keep away from open flames, hot surfaces and sources of ignition.

Temperatures above 48.8°C / 120°F. Exposure to elevated

temperatures can cause product to decompose.

Incompatible Products Water. Alcohols. Strong bases. Strong oxidizing agents. Finely

powdered metals.

Hazardous Decomposition Products

Carbon monoxide (CO), Carbon dioxide (CO₂), Nitrogen oxides

(NOx), Hydrogen cyanide.

Hazardous Polymerization Hazardous polymerization does not occur.

11. TOXICOLOGICAL INFORMATION

Acute Toxicity

Sensitization - Skin Skin contact may cause an allergic skin reaction. Animal studies have shown that skin contact

with isocyanates may play a role in respiratory sensitization.

Sensitization – RespiratoryMay cause allergic respiratory response. MDI concentrations below the exposure guidelines

may cause allergic respiratory reactions in individuals already sensitized. Asthma-like symptoms may include coughing, difficult breathing and a feeling of tightness in the chest.

Occasionally, breathing difficulties may be life threatening.

Product Information

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Flame retardant	>5000 mg/kg (Rat)	1230 mg/kg(Rabbit) 5000 mg/kg(Rat)	5 mg/L (Rat) 4 h
Polymethylene polyphenylene isocyanate	49 g/kg (Rat)	9400 mg/kg (Rabbit)	490 mg/m ³ (Rat) 4 h
Methylene bisphenyl isocyanate (MDI)	9200 mg/kg (Rat)		
Polyol blend	2 g/kg (Rat)		
Polyol blend	64 mL/kg (Rat)	20 mL/kg (Rabbit)	
Isobutane			658 mg/L (Rat) 4 h
Methylenediphenyl diisocyanate		6200 mg/kg (Rabbit)	0.369 mg/L (Rat) 4 h
Propane		658 mg/kg (Rat)	
Dimethyl ether			308 g/ m ³ (Rat) 4 h

Chronic Toxicity

Chronic Toxicity Repeated or prolonged exposure may cause central nervous system damage. Tissue injury in

the upper respiratory tract and lungs has been observed in laboratory animals after repeated excessive exposures to MDI/polymeric MDI aerosols. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal. Chronic hydrocarbon abuse has been associated with irregular heart rhythms and potential cardiac arrest. Repeated or

prolonged contact causes sensitization, asthma and eczemas.

Carcinogenicity There are no known carcinogenic chemicals in this product

<u>Mutagenicity</u> Contains no known mutagenetic chemicals

Reproductive Toxicity

This product does not contain any known or suspected reproductive hazards

Target Organ Effects Contains component(s) that have been reported to cause effects on the following organs in

animals: Kidney, Liver, Bone marrow.

Endocrine Disruptor InformationThis product does not contain any known or suspected endocrine disruptors

12. ECOLOGICAL INFORMATION

Movement & Partitioning: In the aquatic and terrestrial environment, PMDI movement is expected to be limited by its

reaction with water forming predominantly insoluble polyureas.

Persistence and Degradability: In the aquatic and terrestrial environment, PMDI reacts with water forming predominantly

insoluble polyureas that appear to be stable. In the atmospheric environment, material is expected to have a short tropospheric half-life, based on calculations and by analogy with

related diisocyanates.

Ecotoxicity

Ecotoxicity effects.

Chemical Name	Toxicity to Algae	Toxicity to Fish	Microtox	Daphnia Magna (Water Flea)
Flame retardant	EC50 = 4 mg/L 96 h		EC50 = 295 mg/L 30 min	EC50 = 63 mg/L 48 h
	EC50 = 45 mg/L 72 h		_	
Methylenediphenyl	EC50 = 3230 mg/L 96 h			EC50 > 1000 mg/L 24 h

Propane	2.3
Dimethyl ether	-0.18

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method Should not be released into the environment. Dispose of in accordance with local regulations.

Allow foam to cure before disposal.

Contaminated Packaging Dispose of in accordance with local regulations

US EPA Waste Number D001
