MISSION STATEMENT

Our mission is to provide customers like you with ideas to improve your manufacturing processes, make an impact on product quality, and increase your productivity and profitability. The companies we represent offer the best equipment and supplies available in the metal finishing and parts washing industries. Our experience in the field makes us uniquely qualified to help you solve your production problems.

We utilize our own lab facility, in addition to those maintained by our vendors, to analyze processes and provide the best solutions for your needs. We provide continued support throughout the relationship in order to ensure you have the most efficient process available. We also provide in-house and on-site demonstrations of processes.

We are committed to you . . .our customer. No matter the size of your operation, we have the experience necessary to find solutions that will work for you.

QUALITY POLICY

It is our policy to provide our customers with the highest quality products, the most efficient channel of distribution, and competitive pricing. We intend to be the premier supplier of surface enhancement technology to the markets and industries we serve.

Abrasive Products is committed to customer satisfaction, continuous improvement and offering our shareholders a consistent and acceptable return on their investment.
