

## **Instructions**

### **DIRECTIONS FOR USE**

This product is designed for use in properly balanced pool water.

1. Shake well before use.
2. Add Free & Klear weekly at a rate of 4 oz per 10,000 gallons for routine maintenance. Add product directly to the pool water, distributing it over as wide an area as possible.
3. For high bather loads, double or triple doses can be used. Alternately, the standard dose can be used more often (i.e. twice weekly).
4. Similarly, if the pool is currently cloudy or has heavy waterline buildup, use SeaKlear's other clarifier formulas or waterline cleaners prior to switching to the Free & Klear for maintenance.
