

Instructions

Dosage

Add 2 oz for up to 500 gallons of spa water weekly.

Directions For Use

1. Remove the spa cover before oxidizing. Leave the cover off for at least one hour after oxidizing.
2. With the pump running, disperse SeaKlear Balanced Shock Oxidizer into spa. Add to water with circulation jets on.
3. Wait at least 15 minutes before entering water.
4. After each application, run your pump and filter system continuously for at least two hours. This product is not a sanitizer or an algaecide. For routine disinfection, use an EPA registered product according to label directions.
