

ELEGANCE TWINFILTER®

Staged filters
for 25m³ to 95m³ pools.

A HIGH-END, HIGHLY EFFICIENT MODEL THAT OFFERS ALL THE ADVANTAGES OF CARTRIDGE FILTERS AND SIMPLIFIES THE CONSTRUCTION OF YOUR POOL.

- Compact, modular design
- Reliable operation under vacuum with patented, automatic drainage
- Environmentally-friendly: easy, water-saving cleaning

- Integrated filtration = no pipes for connection to the filter
- Can be assembled on a concrete, concrete/liner, panel/liner or shell wall.
- Classic in-ground assembly or assembly in a filter unit.
- A first tank with high capacity 500-micron pre-filter bag to collect leaves and small debris
- A second tank with high-capacity 15-micron filter cartridge for optimal filtration quality and a longer service life
- Integrated clogging indicator
- Environmentally-friendly
- Custom manufacture is available on request with another type of skimmer, e.g. Design.

1. Pre-filter
2. Filter
3. Cover
4. Water circulation
5. Pump connection
