

Why Choose Xcel Surfaces?

Beautiful Architecture Through Technology

Established in 1996, Xcel Surfaces was created in response to a growing demand for quality surfacing products and services.

Engineered systems for concrete texturing, coloring and superior performance are our mainstay. Decorative concrete is one of the most popular methods to affordably enhance landscapes and interior architectural surfaces.

Xcel Surfaces offers everything needed to transform pool decks, patios, driveways, walkways, counter tops, garage floors and more!

Style Meets Function...

Xcel Surfaces is ideal for use in new construction or renovations. Its applications are limited only by your imagination. If enhancing the look of your existing concrete is what you are looking for, Xcel Surfaces offers a variety of stains, sealers and epoxy systems.

- Authentic looking textures
- Cost effective and quickly installed
- Can be applied over new or existing concrete
- Stronger and more durable than regular concrete
- Easy to maintain and highly resistant to UV, stains and mildew

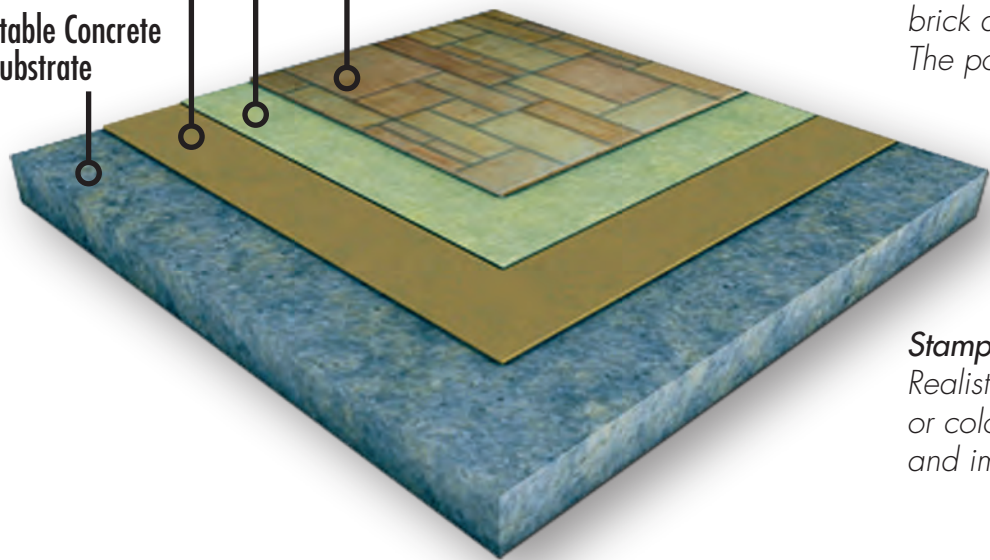

Xcel Surfacing Systems...How They Work

Your Choice of Xcel Surface

Xcel Scratch Coat

Xcel Bond Coat

Stable Concrete Substrate

Thin Overlay System:

Stylish, innovative colored surfaces that can be stenciled or imprinted to mimic an array of other materials like tile, brick and stone. The possibilities are endless!

Stamped Overlay System:

Realistic patterns in virtually any texture or color created by embossing skins and imprinting tools.

ALL COLOR SAMPLES ARE PROVIDED AS A GUIDE ONLY. ACTUAL COLORS MAY VARY SLIGHTLY.
