Smart Water Analyzer

Get Connected.
Stay Balanced.

Water Balance Made Easy with Accurate Readings & Alerts — Anytime, Anywhere

Never worry about your pool water being out of balance. The Blueriiot™ Smart Water Analyzer takes precise readings and alerts you and your pool pro if the water balance is off.

Available only if customer shares product key code.

One Smart Solution for All

In-Ground Pools

Above-Ground Pools

Spas

Salt or Non-salt Pools

Easy to Use — Easy to Install

Just drop it in your pool or spa, download the app and you're good to go. The Blueriiot Smart Water Analyzer takes precise readings, and provides chemical recommendations and instructions on how to balance the pool water.

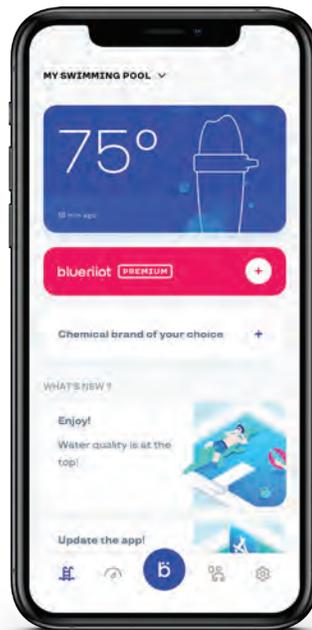

Check Your Readings Wherever You Are

Taking a holiday? There's no need to worry while you're away — automatic readings are sent via Wi-Fi right to the app on your phone. You can even add your pool pro to your account so you'll have peace-of-mind that they're watching over your water balance.

Worry-Free Water Care

It's easy to keep your pool or spa water balanced

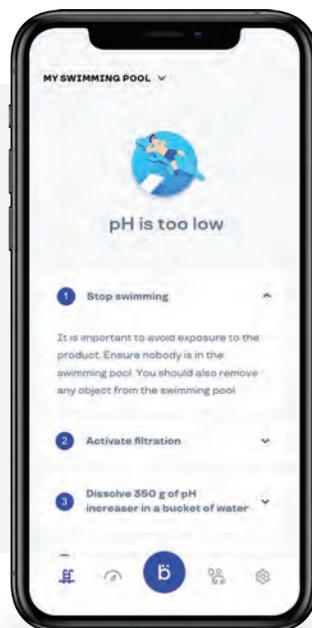

Automatic readings sent straight to your phone

- Water temperature
- pH
- ORP (sanitation potential)
- Conductivity (salinity)

Get chemical recommendations and stay balanced

- Chemical recommendations adapted to your pool or spa
- Step-by-step instructions to balance pool or spa water
- App will alert you if your pool water is out of balance.

Perfectly Balanced Pool Water is Easy as 1...2...3...

1

Download the Blueriot - Blue Connect app

2

Link the device to the app via Bluetooth

3

Floats in pool or spa

4

Connect to Wi-Fi for continued connectivity anytime, anywhere.

(Optional upgrade; may be sold separately)

5

Get your water chemistry readings!

Choose your product

Select From Two Product Options

A standard Bluetooth model with an option to upgrade to full connectivity via the Wi-Fi Bridge (sold separately). Or, buy the complete bundle as our most premium offering.

Upgrade to Wi-Fi for anytime, anywhere readings

Check your readings on the go with Wi-Fi connectivity. The Wi-Fi Bridge ensures you're always connected — anytime, anywhere. The Smart Water Analyzer and Wi-Fi Bridge are sold separately or in a bundle.

Convenient Water Checks

Stops problems before they start with water chemistry readings taken throughout the day — so common issues like corrosion, calcium scaling, chlorine overdoses, and more can be prevented before they arise.

When combined with Wi-Fi, automatic readings are conveniently sent straight to the mobile app where you and your pool pro can receive customized alerts.

Easy Upkeep

Replace the battery and probe every 18-24 months and calibrate the probes once per year for optimum performance.

Wi-Fi Bridge

PART # BLWIFI

- Connects to the cloud for access to readings & information anytime, anywhere
- Enables you to receive automatic alerts & notifications
- Provides chemical recommendations
- Provides access to historical data & trends

Sensor Probe Kit

PART # R7015R002

- Works in all bodies of water: Pools, Spas, Salt, and Non-Salt
- Replace every 18 – 24 months

Replaceable Battery

PART # R7015C001

- Replace every 18-24 months
- Does not need to be recharged

Calibration Kit

PART # R71666

- Solution packets to calibrate pH and ORP
- Recalibrate every year
- Calibration done through the app

Keeping Your Pool Pro in the Know

Pool professionals can monitor your readings and be ready to arrive prepared with the appropriate solution to get you back to balanced and back in the pool in less time.

Just share your product key code so that your pro and anyone else you want can monitor the same Smart Water Analyzer.
